2nd Street Improvements Project

Project Description: The Second Street Improvement project is intended to transform the Second Street corridor in the east South of Market (SoMa) neighborhood into a pedestrian- and bicycle-friendly complete street, consistent with the vision identified by the community in the East SoMa Area Plan.

Project Status: Construction; Substantial Completion Winter 2020

EN IPIC Funds: \$4.9 million **Total Cost:** \$39.8M

22nd Street Green Connection

Project Description: Streetscape improvements along 22nd Street in the Dogpatch neighborhood between Illinois Street and Pennsylvania includes new pedestrian lighting, paving, corner bulb-outs, new street trees and drought tolerate planting, and decorative cross walk treatments.

Project Status: Substantial Completion; LTPE through July 2019

IPIC Funds: \$3.8 million **Total Cost:** \$4.5 million

Minnesota Streetscape Project

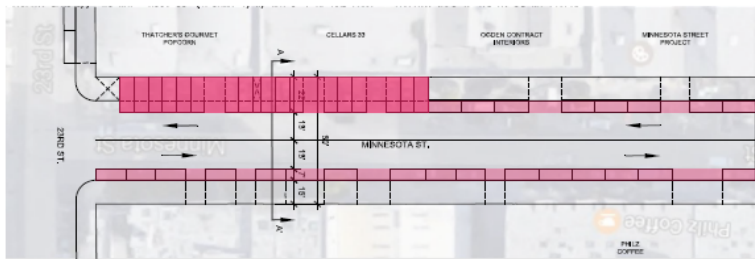

Project Description: The Minnesota Streetscape project will install sidewalks and streetscape elements (trees, lighting, etc.) along the east side of Minnesota from 23rd to 25th Streets in Dogpatch. The project will also make modifications to the existing linear green space known as Minnesota Grove.

IPIC Funds: \$4.5M

Total Cost: \$4.5M

Potrero Gateway Project

Project Description: The Potrero Gateway project consists of a series of open space and streetscape improvements under and around Highway 101, 17th Street between Vermont and San Bruno.

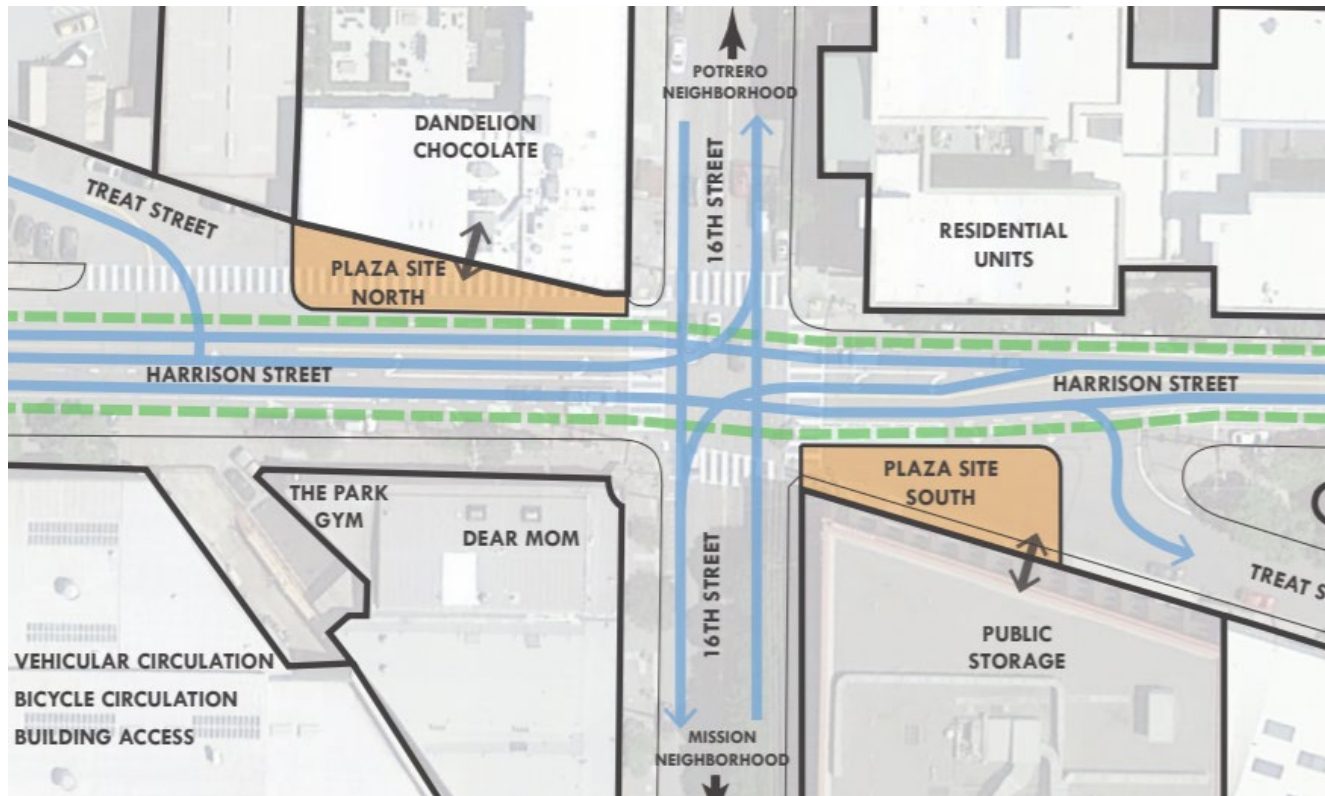

Project Status: Design

IPIC Funds: \$1.75 million **Total Cost:** \$3M

Treat Plaza (South Plaza)

Project Description: The project will improve safety, comfort, and mobility for pedestrians, cyclists, transit riders, and motorists. The sidewalk will be extended farther into the intersection, and planters will offer decorative seating, and provide a protective barrier to traffic.

Project Status: Design

IPIC Funds: \$1.1 million **Total Cost:** \$2 million

Market Octavia CAC

October 21, 2019

Upper Market Pedestrian Improvements

Project Description: The project will construct concrete corner curb extensions, or “bulbouts” to shorten pedestrian crossing distances, slow the path of vehicles turning right, and create more sidewalk space.

Project Status: Design

IPIC Funds: \$8.7 million **Total Cost:** \$9M

Living Alleys Project

Project Description: The Living Alleyways program is an ongoing effort to re-imagine the area's extensive network of alleyways as an alternative transportation network and opportunity for community-scale places for public life.

Project Status: Planning

IPIC Funds: \$4 million **Total Cost:** TBD
